

DESIGN DAYS

by A-dec

with Lori Saleba

COME WITH A VISION. LEAVE WITH A PLAN.

How will your patients feel when they walk through the doors of your practice? From flow and aesthetics to finish materials and focal points, first impressions last. Design makes a powerful emotional impact, and speaks volumes about your practice.

What will yours say?

With guidance from Lori Saleba, experienced professional designer and dental resource consultant, you can efficiently navigate the many choices ahead of you, and ensure that your workflow, lighting, acoustics, finishes and materials are in line with

your vision and budget. You will leave the complimentary consultation with a packet of samples and a design kit for your dental operator including cabinet finishes, chair upholstery, flooring and flooring transitions, wall base and paint selections.

Schedule your complimentary design consultation.
